Legend: Performance is computed on a monthly basis as the median performance of all the FCT 1e insured members invested in the investment strategy (if no insured member is invested, performance is backtested). In both cases, performance is computed as a time weighted rate of return (TWR) on the investment portfolio, excluding operational cash. Performance is shown net of indirect fees (charged inside the funds) and gross of direct fees (charged outside the funds). Foreign currency exposure is after currency risk hedging. Proportion of ESG investments correspond to ESG-labelled funds as considered by the asset manager.
